

Language Check-up for the accurate assessment of your language skills

Quick overview of language skills

Thanks to our precise language test, you will receive an accurate picture of your current writing and speaking skills – for private purposes, diploma goals, in the naturalization process or for your job application. For companies it is the ideal tool during the recruitment phase or for existing employees, integrating seamlessly into your ongoing selection process.

Fast, simple and uncomplicated

The process is very straightforward: you - or in cases of recruitment, your candidate - take our written online test: <https://sprachschuleschneider.ch/einstufungstests>. The test checks vocabulary, grammar and writing skills. This is followed by a telephone interview, providing a detailed and precise evaluation of speaking skills and language confidence. You will receive the results by e-mail immediately after the completion of the test.

Short check-up

If all you require is a quick assessment without taking speaking skills into account, a short check-up of vocabulary and grammar is available as an alternative.

Speaking check-up

If you only need information about speaking skills, this option is available to you. We assess your ability to talk about various private and professional topics in a fifteen-minute telephone call.

Professional assessment by experts

Our experts are specially-trained native speakers, who conduct the interview with professional expertise. In the case of a recruitment procedure or the assessment of an employee, we take into account your requirements and those of the applicant's role.

The results of this standardized test are based on the "European Framework of Reference" and therefore offer you an optimal assessment as well as comparison possibilities in recruiting.

Personal training consultation

If you are planning further language training, whether as a private person or for your employees, we will support you with advice on the phone, via Skype or in a personal consultation at our school. We will conduct the interview for your company either with the personnel manager or with the candidate themselves on request. You will receive suggestions for solutions and concrete information on the length and cost of a training course, based on the current training status and objectives. When you book a course, the costs for this consultation will be fully credited to your account.

Languages

The test is available in the following languages: English, German, French, Spanish and Italian.

Advantages

- clear and detailed processing of results by e-mail
- results based on the European Framework of Reference for optimal comparability
- minimal administrative costs
